

Decarbonize Wisconsin Energy Production by 2045 (79 Words)

WHEREAS climate change poses an existential threat to life on earth; and

WHEREAS a carbon-neutral energy economy is possible by combining conservation, existing technologies, and a comprehensive research program; and

WHEREAS municipalities with over 70% of Dane county's population and about 30 other diverse community entities have adopted a 100% renewable energy by 2050 climate action framework;

THEREFORE; RESOLVED that the DPW is committed to policies that will lead to the decarbonization of Wisconsin electric energy production by 2045.
