

## ***Resolution in Support of Green Energy Jobs***

**Whereas**, fossil fuels pose serious risks to our environment;

**Whereas**, fossil fuel projects continue our dependence on foreign oil revenues and products;

**Whereas**, fossil fuel projects often deepen historical injustices by being located in places where residents lack financial wealth and political influence;

**Whereas**, we support Green Energy infrastructure and jobs, protection of natural resources, access to clean drinking water, and environmental justice;

**Therefore be it Resolved**, that the Democratic Party of Dane County supports limiting new and foreign fossil fuel infrastructure projects in the United States and expanding Green Energy infrastructure and job creation.
